**Subject:** Site walk-through for Brunswick East River Mystery Sheen

---

Good Afternoon Everyone,

Based on everyone's feedback, next Thursday at 1000 works for the group. Please plan to meet at Ocean Petroleum (OP) first. After we walk through OP, we can easily walk right next door to PAC COMM. Once that is complete, we will have to drive to Mayor's Point to look at that property too.

Please remember to bring your PPE, to include COVID related items, hard hat, and life jackets in case we need to walk on any of the docks.

Just for your awareness again on our future plans, in about 3 weeks we plan to:

- Install ground water monitoring wells on all properties
- Fully investigate Ocean Petroleum's property to include GPR and ground sampling.
- Gather samples on property adjacent to Ocean Petroleum's fence line to the south.

Thank you in advance for your time. Please let me know if you have any questions before we meet up next week. Also, please feel free to forward this email if you plan to have someone else attend in your place.

Respectfully,  
LT Matthew Spado
